How to start:

- Each player must choose a Kong character piece and their respective dice. (Only 2 to 4 players are allowed.)
- Each player receives:
  - 5 of each bill up through $100
  - 3 $200 bills
  - 3 $300 bills
- Each player receives a level checklist and then must place their piece on the “GO” space.
- Make sure that all cards and bills are in their respective piles.
- Make sure that all Camera Pieces, Golden Feathers, and Banana Birds are on their respective spaces on the board.

How to win:

- The ultimate goal is to reach the "Finish!" space located near "GO". However, it is locked until you have completed several tasks.
- Once you have built and checked off all DKC levels, you may enter the gate to Gang-Plank Galleon (accessed through Vine Valley). Once you are inside, whenever it becomes your turn…
  - If you have 6 or more Camera Pieces, you may roll your dice. If you roll an even number, check off the "Gang-Plank Galleon" box on your level checklist. Your roll is considered as your turn.
  - If you have less than 6 Camera Pieces, instead of rolling the dice, you may choose to take one Camera Piece from whichever player has the most.
  - If you already have "Gang-Plank Galleon" checked off, you must roll to leave the area and proceed through Vine Valley.
- Once you have built and checked off all DKC2 levels, you may enter the gate to Krocodile Kore (accessed through Krem Quay). Once you are inside, whenever it becomes your turn…
  - If you have 6 or more Golden Feathers, you may roll your dice. If you roll an even number, check off the "Krocodile Kore" box on your level checklist. Your roll is considered as your turn.
  - If you have less than 6 Golden Feathers, instead of rolling the dice, you may choose to take one Golden Feather from whichever player has the most.
  - If you already have "Krocodile Kore" checked off, you must roll to leave the area and proceed through Krem Quay.
- Once you have built and checked off all DKC3 levels, you may enter the gate to Knautilus (accessed through Pacifica). Once you are inside, whenever it becomes your turn…
  - If you have 6 or more Banana Birds, you may roll your dice. If you roll an even number, check off the "Knautilus" box on your level checklist. Your roll is considered as your turn.
  - If you have less than 6 Banana Birds, instead of rolling the dice, you may choose to take one Banana Bird from whichever player has the most.
  - If you already have "Knautilus" checked off, you must roll to leave the area and proceed through Pacifica.
- When ALL of the check boxes on your level checklist are complete, including Gang-Plank Galleon, Krocodile Kore, and Knautilus, you may enter the gate to the "Finish!" space and win the game.

On your turn:

- Roll the dice and move that many spaces in the correct direction. If the path splits, you may choose one.
- Follow the directions according to the space that you land on:

Collect whatever level-building card is labeled on the space.

Draw the top Bonus Barrel card of the type labeled on the space. ("ANY" means the Bonus cards labeled as "ANY", *not* any type of Bonus card you want.) Read the card it and follow the directions, and then place the card on the bottom of its pile.

You have the option to trade with one or more other players. Trades can include only cards, or both cards and money.

You must switch positions with another player of your choice (if you can). You may not switch with anyone on the Gang-Plank Galleon, Krocodile Kore, Knautilus, or "Finish!" spaces.

On your next roll, you have the option of adding or subtracting 1 from the amount rolled, or you can move the exact amount rolled. However, you may not move zero spaces.

Roll your dice, and multiply the amount rolled by 50. Receive that much money.

Roll your dice, and multiply the amount rolled by 50. Lose that much money (but, you cannot have less than $0).

If there is a special piece on the space, you may take it. If it is empty and you have a special piece of the type shown, put one on the space.

Roll your dice. If you roll an odd number, lose the most recent level you have built.

Important notes:

- The Gang-Plank Galleon, Krocodile Kore, Knautilus, and "Finish!" spaces are landed on whenever they are reached; the exact number from a dice roll is not needed to land on them.
- Players will receive money whenever landing on or passing over the "GO" space.
- If a player loses all money, they are not forced out of the game.
- Loaning and owing money are not allowed, including both people and the bank. (You are not allowed to make any purchases if doing so will cause you to have less than $0.)
- Card-trading is never allowed except for on Trade spaces.
- Level-trading, checking off levels without the correct cards or money, or unchecking levels unless told to do so by Bonus cards, are never allowed.
- If the bank does not have any more money, simply do not take money when certain spaces or cards instruct you to. If you are told to receive money but there is not the correct kind of bill to do so, round down.
